

Creating Your First Neural Network in Keras

Jerry Kurata

CONSULTANT

@jerrykur

Keras Installation Options

Keras Library in TensorFlow

Import `tf.keras`

No need to install standalone Keras

Close integration with TensorFlow

Tied to TensorFlow

Not shown in this course

Standalone Keras Installation

Download and install Keras

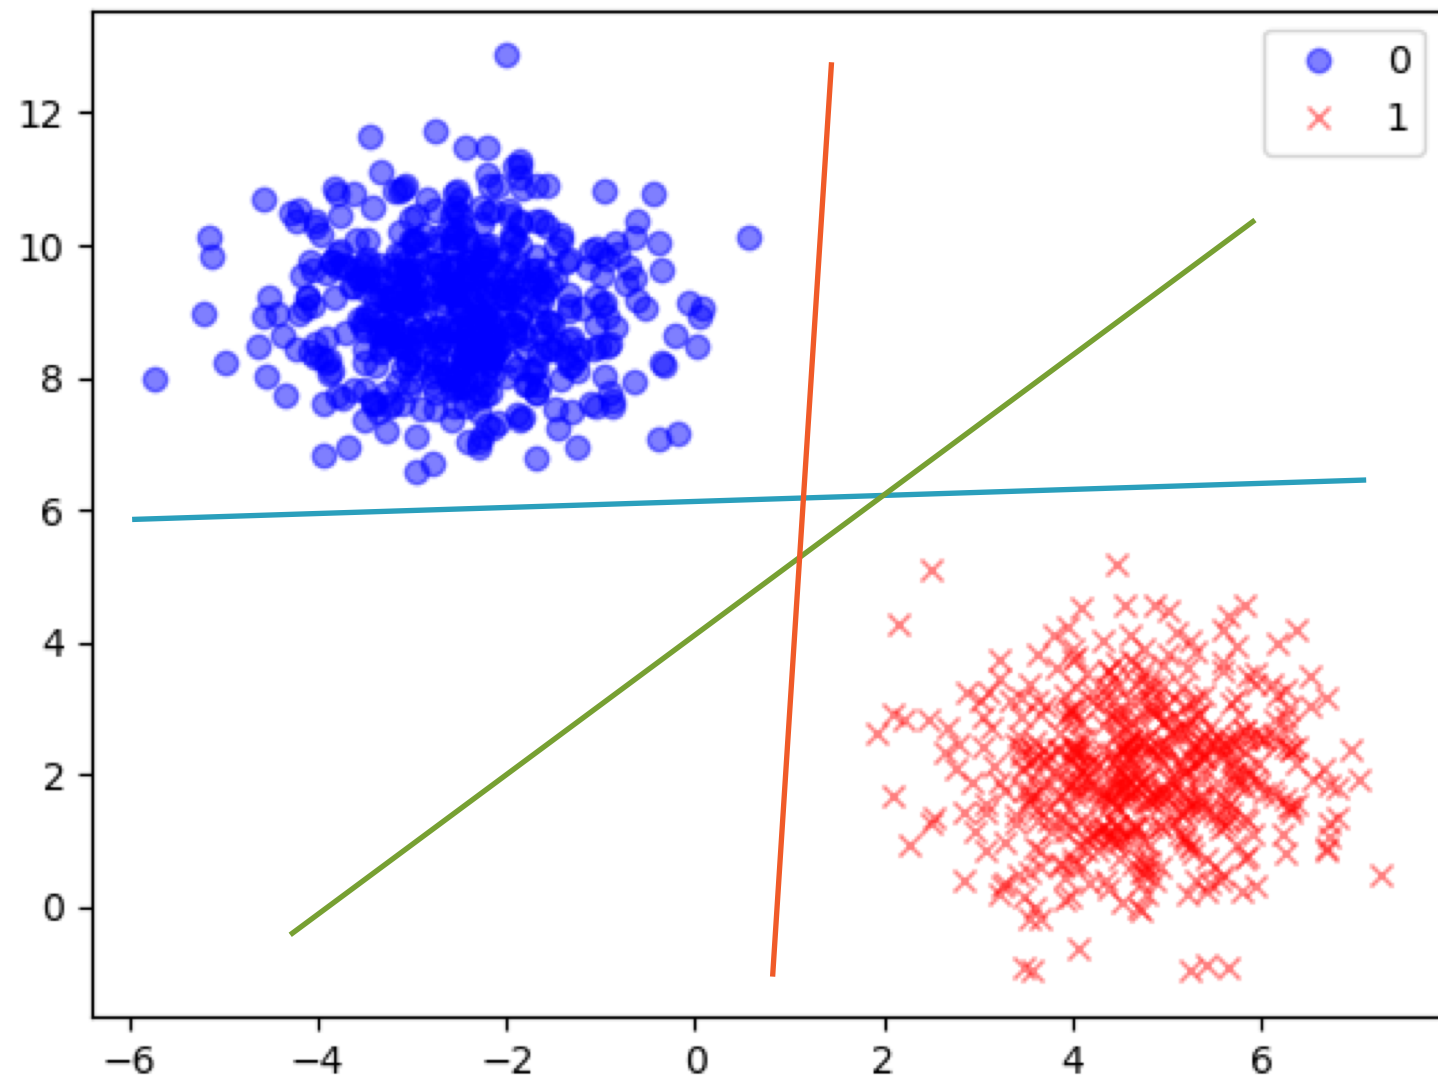

Install Keras on system/environment

Keras handles interface with backend

Supports TensorFlow, Theano, CNTK

Used in this course

Demo

Changing Backend
